PROJECTS

Fake and Real News Detection using Machine Learning

- Built a machine learning model to classify news articles as real or fake based on their textual content.
- Applied text preprocessing (tokenization, stop-word removal) and TF-IDF feature extraction to convert news text into numerical features.
- Trained and compared classification models, including Logistic Regression and Naive Bayes, to identify the best-performing approach.
- Evaluated model performance using accuracy, precision, recall, and F1-score on a labeled news dataset.
